SUMMARY

Results-driven Computer Science & Business Systems undergraduate (CGPA: 9.03, AI Minor) passionate about building intelligent, real-world solutions across ML, NLP, computer vision, and full-stack development. Backed by award-winning projects, government-supported education contributions, and industry internship experience, I am eager to apply my technical and analytical skills to create meaningful, lasting impact.

EDUCATION

St. Vincent Pallotti College of Engineering & Technology, Nagpur <i>Bachelor of Technology in Computer Science & Business Systems, Minor in AI</i>	08/2023 – 05/2027 CGPA: 9.03
K. John Public School <i>Secondary Education</i>	07/2011 – 02/2021

SKILLS SUMMARY

Languages: Python, C++, JavaScript, TypeScript, C

Frameworks: React, React Native, Scikit-learn, TensorFlow, Django, Flask, Node.js, PyTorch, OpenCV, Kivy

Tools: VS Code, Git, Postman, Power BI

Libraries: Pandas, NumPy, Matplotlib

EXPERIENCE

Matverse Vision Pvt Ltd – Intern <i>Machine Learning Intern</i>	03/2026 – 06/2026
---	-------------------

- **Irrigation Requirement Forecasting:** Built an ML model to forecast crop irrigation requirements integrating a 43-feature dataset from NASA POWER and SoilGrids APIs, covering 44 years (1981–2024) of historical climate and soil data across multiple agro-zones in Vidarbha region.
- **Data Collection and Feature Engineering:** Collected and merged multi-source datasets (NASA POWER climate records and SoilGrids soil properties) using BallTree haversine nearest-neighbour matching; engineered features for 7 soil and climate variables including moisture, temperature, and rainfall, reducing manual data-cleaning effort by 60%.

Vigyan Bharati <i>Technical Trainer & Lecturer</i>	12/2024 – 01/2026
--	-------------------

- **Technical Training:** Delivered 20+ technical lectures under the Atal Tinkering Lab (ATL) initiative across 5+ government schools in multiple districts, directly impacting 300+ students.
- **Mentorship:** Trained 100+ school teachers, ITI students, and school students on emerging technologies and practical innovation, improving hands-on STEM engagement across participating institutions.

PROJECTS

Legislate AI: AI-powered legal assistance platform for legal guidance, document drafting, and workflow automation to improve access to justice. [GitHub](#)

Tech Stack: React, TypeScript, HTML, CSS, Git, n8n, OpenRouter, Google AI Studio

DatalakeAuth: Offline facial recognition and liveness detection mobile app achieving 95%+ authentication accuracy with a sub-20 MB model footprint. [GitHub](#)

Tech Stack: React Native, MobileFaceNet, TensorFlow Lite, SQLite, AWS

Disaster Prediction System: ML-based disaster prediction and impact assessment system supporting timely response and decision-making. [GitHub](#)

Tech Stack: Python, Random Forest, Flask, React, Pandas, NumPy

Face Verification System: Real-time face authentication using Siamese Neural Networks and deep learning. GitHub

Tech Stack: Python, TensorFlow, OpenCV, Kivy

Intent Recognition System: NLP model for classifying user intents for chatbots and automation systems. GitHub

Tech Stack: Python, NLP, Scikit-learn, Flask

HONORS AND AWARDS

- Secured 2nd Runner-Up at Socio-Ideathon 2025 for presenting an AI-powered Legal Assistant focused on improving access to legal information and justice.
- Featured in Shankarnath Local News Channel for notable technical achievements and initiatives.
- Secured 3rd Position at the Innovolt Project Competition conducted by SB Jain College.
- Secured 3rd Position at the Data Visualization Hackathon organized by SB Jain College.
- Received appreciation and felicitations from the college and department for contributions in the technical domain.
- Delivered lectures under the Atal Tinkering Lab (ATL) initiative across 5+ government schools in multiple districts.
